2 - What were the most effective aspects of this course?

Response Rate	8/15 (53.33%)
<ul style="list-style-type: none"> • I love that Valerie has provided video learning along with the written out content. Being a creative, seeing the visual examples is vital to my understanding. • I don't know • Lots of communication, help and resources. • I enjoyed some of the readings and the videos • Valerie is a great teacher, you can tell she really cares about her students and the class she teaches. The materials were excellent, as were the additional readings and the videos. Even though it seemed like a lot of work, I really appreciated the homeworks too. I learned from them and they made me focus more on what I was reading/ watching. She was also very communicative and always coming up with ideas for us to learn- from her and from each other. Overall, this was my favorite class from the semester (I'm taking 3 classes). • The range of materials provided. And very creative, diverse assignments. • Great introduction to color theory, with a wide variety of applications; I appreciated being able to apply the information across different physical and digital mediums. • n/a 	

3 - What, if any, suggestions do you have for the course?

Response Rate	6/15 (40%)
<ul style="list-style-type: none"> • Too much discussion to do. • Online platform (Canvas and Lynda) are difficult/confusing to use. The course required a lot of commenting, online conversations, and emails which made it difficult to keep up. I expected the online course to be more convenient given you managed your own time, but it was actually less convenient and required more time than if attending an on-campus class. • The class felt rather redundant • Just keep up the good work :) • In terms of structure, it would be good to deepen the content a bit, as well as organize it perhaps in a more systematic way. I found that some readings/lectures after week 2 or 3 began to seem a bit repetitive (i.e. overview of primary, secondary, tertiary colors, etc) • n/a

Response Rate 7/15 (46.67%)

- Valerie is very communicative and provides options for many different types of learners with all different schedules. I loved that she gave many examples of the topics we discussed in several forms of teaching- videos, Lynda, articles, readings and practices. Also, she leaves time to complete assignments after their due date so that if there is a week of sickness or travel you still have the opportunity to learn and practice. This is the first online course I have taken where I feel that have an understanding of the material as much as an in person course provides.
- Couldn't focus...
- I didn't fully understand many of the assignments. The questions were broad and didn't really make sense to me.
- Very effective, especially the homeworks and discussions.
- Very enthusiastic teacher and passionate about her subject. Eye-opening presentations and projects. Excellent class. Only one suggestion: Homework feedback came in waves every 4 weeks or so....would have been better maybe to get it all along to apply to other projects.
- Great, personalized feedback on all assignments, as well as constructive criticism. I wish I were able to take the class in person, I think Valerie would have been an even more effective instructor.

7 - Please comment on how the assignments you completed for the course align with the learning objectives outlined in the syllabus.

Response Rate 6/15 (40%)

- Each of the assignments asked us to use the theories that we were learning about and were directly relative to what we covered that week.
- Too much work to do. Couldn't handle
- Each assignment was thought throughly, and the weekly discussions were you had to share what you learned that week were also very helpful.
- In addition to the mechanics of the color wheel, we were given various color explorations in different modes. And the discussions encouraged thought and perception.
- All assignments based on learning goals and material covered, appreciated looking at color theory in different creative industries and its application therein.

<ul style="list-style-type: none"> • Lynda.com should be referenced in every online course for online learning. I have another course where all instructions and teachings are written out and it is hard to visualize the actions. Having the video example is so great. • Lynda was difficult to use - issues with logging in, saving videos, bookmarking pages, etc. • Didn't use any facility or equipment. • Lovely to be introduced to Lynda.com; I was not aware that we had access to that service • n/a

<ul style="list-style-type: none"> • Art Direction Courses or an art direction certificate. I can't find one in New York and would love to have it here. They have one at The Creative Circus in Atlanta but I am unaware of the details of the program. • My only suggestion is to not put the classes from a same certificate at the same time on the same date. I tried registering for two classes this summer but couldn't do it because they were at the same time. This is going to delay me getting my certificate on time.
