

# MoSCoW

## Prioritization

M

Ease of access/organization  
Unified UI Design (for officially curated playlists)

S

Better color coding (artist profiles, playlists etc.)  
Less bloated icons/graphics (some desktop versions appear too big)

C

A wider variety of songs to choose from  
(streaming competitors may have more to offer)

W

Higher fidelity audio (I can't really do that for this project at least)
