

Assignment 2 Option 1: Color application, Make a Grid of colors based on what I'm wearing

I had so much fun with this assignment. Here I used soft body acrylics to achieve my color story. In this photo I am wearing my favorite top for this Fall season. It is a blend of deep saturated yellows and oranges with neutral tones. Already with the first two modules behind me, I was able to figure out how to produce these colors very quickly. I started by procuring secondary colors and then taking it a step further by adding neutrals, ranging in light and dark values. Everything came together quite seamlessly, and I am feeling less intimidated by color just by understanding the theory behind it!

I noticed the hues resulted in are analogous and triadic colors.
