ROOM I ENJOY (MY Living Room)

A vacation I recently went on was to the island of Mauritius. This island is located off the coast of Madagascar in the Indian Ocean. It is the most beautiful tropical landscape imaginable! Everything is different hues of green - from the vibrant green of the lush sugarcane crops to the muted green of an unnamed tropical fruit. I stayed on the ocean. The golden sands met the sparkling blue waters with a kiss of white seashell and jet black lava rock. Around the hotel there were fuchsia flowers cast against the white buildings. Everything was vibrant full of life and contrasting each other in a surprisingly complimentary way. The colors of this vacation will be etched into my memory forever!
