

# Bedroom palette

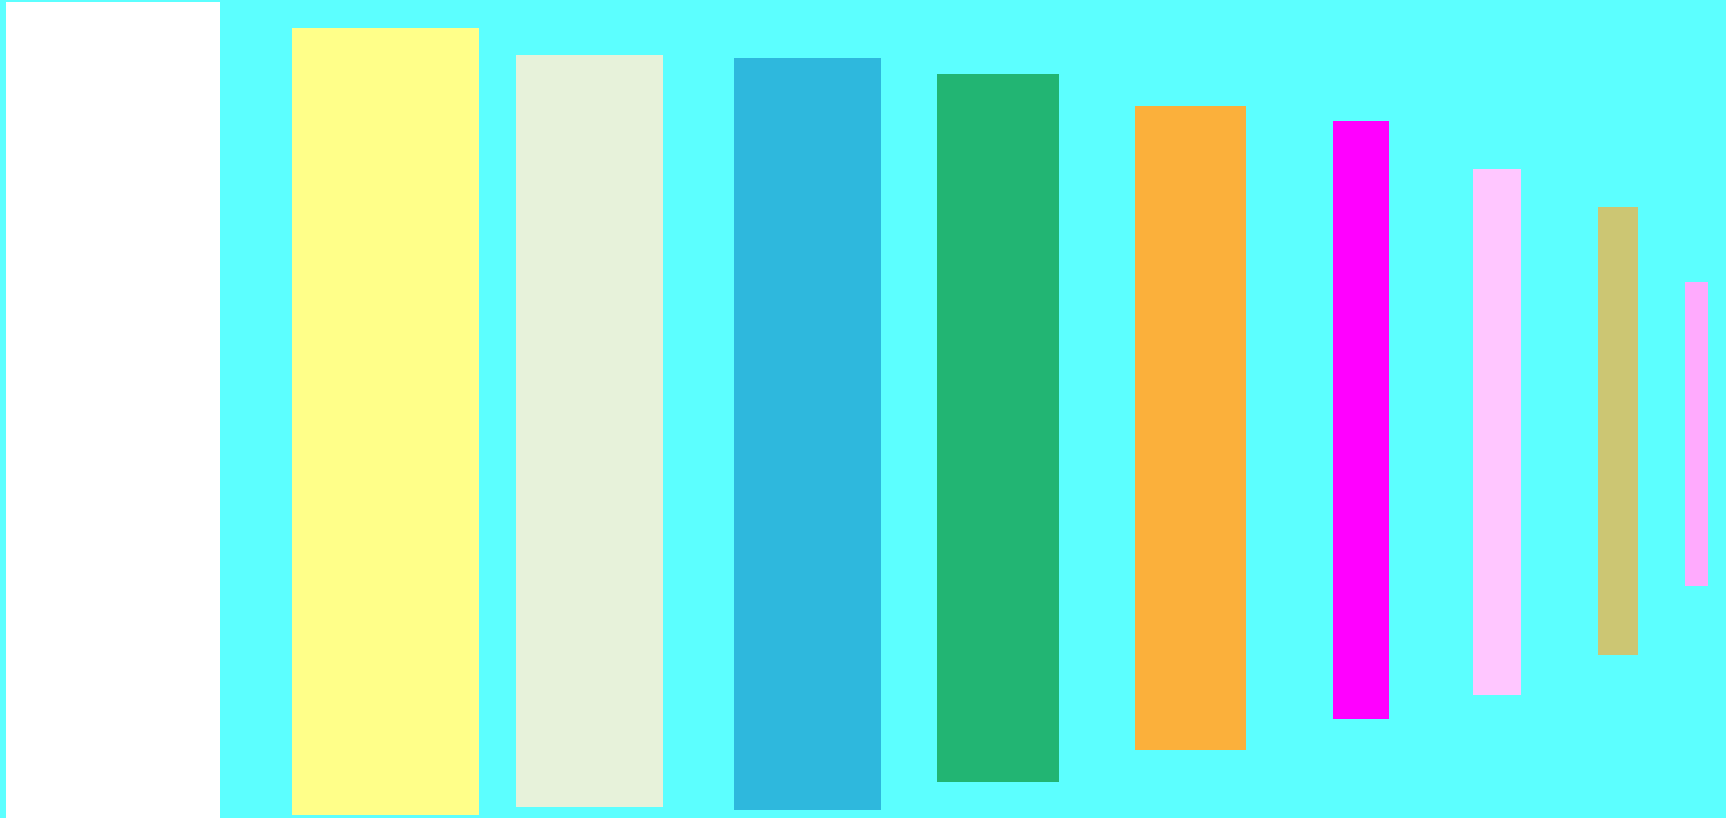

Walls in a dark navy to create a calm, protective cave-like energy. With white trim and linens and couch, for elegant contrast and for a hint of a nautical/ocean airy feel. Strong silver and sage accents.

The bottom row represent less prominent accent colors. More silvers with gold for warmth and pink and turquoise for softness. Brown to add earthy coziness.

The next two pages are playrooms, just for fun :) A beachside one first (different format colors go from strongest to weakest accents) and then a “girly” haven.
