2 - What were the most effective aspects of this course?	
Response Rate	9/15 (60%)
<ul style="list-style-type: none"> • very engaging materials, covered a wide variety of sources and ideas about color theory • The most effective aspects of this course were the readings, films and certain assignments. In my opinion, the most effective assignments were week 2, week 5, and week 6. • the teacher • Discussion and assignments • Hands on activities and content that continued to build upon the foundation set early in the course. • Readings, worksheets, videos, presentation - I liked that the materials were presented in various forms • The assignments we had to do where in direct correlation with each module. Further, we not only looked at articles but also very informative videos that helped to grasp the concepts being learned very well. • I enjoyed the Lynda.com Learning section with Jim Krause and Mary Jane Begin. The overall assignments kept me engaged and was able to reinforce the learning. The instructor also did a good job of pulling in timely articles and digital platforms that enhanced the learning. • I think the most effective aspect was the repetition. Once you step out of the class and attempt to remember the workings of color and color wheel you realize how important it is to have the material down. The content was excellent and I feel like I got a comprehensive understanding of color theory. The course added a greater understanding of color to what I would like to think was already quite good in my application and tastes. 	

3 - What, if any, suggestions do you have for the course?	
Response Rate	5/15 (33.33%)
<ul style="list-style-type: none"> • I think the discussion prompts became a little repetitive, it was always interesting to hear what other people's opinions were but to a certain extent it felt like the same points were being made, especially during the last few weeks. In certain cases, I would have preferred to have more assignments in which we had to apply what we were learning and then shared that work in the discussions. • Make readings more easily accessible • n/a • I would encourage the professor to review the assignment's instructions. On a few, I felt that the instructions were less detailed than I would have preferred. As a result, I was a little confused with what was being asked for. While the professor was always accessible, time constraints and work got in the way of my being able to ask pertinent questions that would have clarified what was being evaluated. I would also take a look at the pdfs used. Some of the images were out of resolution and may have reduced the impact because of pixelation or blurriness. • To keep it as is!

- always accessible, leaves great feedback and answers questions clearly and quickly.
- Valerie was extremely available to answer questions and address concerns throughout the course. I was very grateful for this, especially in an online course.
- Her feedback on assignments and discussion was thoughtful and helpful.
- Responsive, upbeat, helpful feedback
- I very much enjoyed taking Valerie's class - her constructive feedback and how the modules where structure and the content she included was extremely helpful in understanding the subject.
- I enjoyed our class. I felt she did a great job of keeping us engaged and interactive with each other. She provided current resources, along with current examples of color theory in action. Her tools were effective. In addition, she was always accessible, when I reached out.
- Valerie was a stellar teacher. She went above and beyond to guide me when I needed it. Her feedback was just as intimate, as if we knew each other in person.

6 - The syllabus clearly explained course objectives, timelines, and policies.

7 - Please comment on how the assignments you completed for the course align with the learning objectives outlined in the syllabus.

Response Rate 3/15 (20%)

- they aligned well. it was clear what you were learning each week and the assignments help you put it into practice
- The videos we watched throughout the course helped to 'understand how color operates in real time in each of the major adobe software and color spaces'. The readings and discussions aligned very well with the following objectives, 'Cultural connotations and interpretations of color' and 'a grasp of art history in relationship to color theory'. We gained hands-on experience in many of the assignments from this course. The readings were all very helpful for understanding, 'effect on readability..' and 'color and its impact on emotional response...'
- Analyzing art in terms of the modules subjects in writing format was great for real world application. I enjoyed that we were allowed to choose our mediums in hands on color projects and I found them all challenging and well worth the effort.

8 - The instructor was respectful of ethnic and cultural differences and diverse points of view.
