

①

~~send/receive money~~

Bryce, he ~~goes~~<sup>went</sup> to dinner with his friends

②

~~Bill splitting~~

~~He~~ He had such a good time with food and with his friends.

③

~~Decision~~

However, all good things must come to an end. Bryce decided to ~~pay~~ pay everything then he will ~~split~~ split the bill later

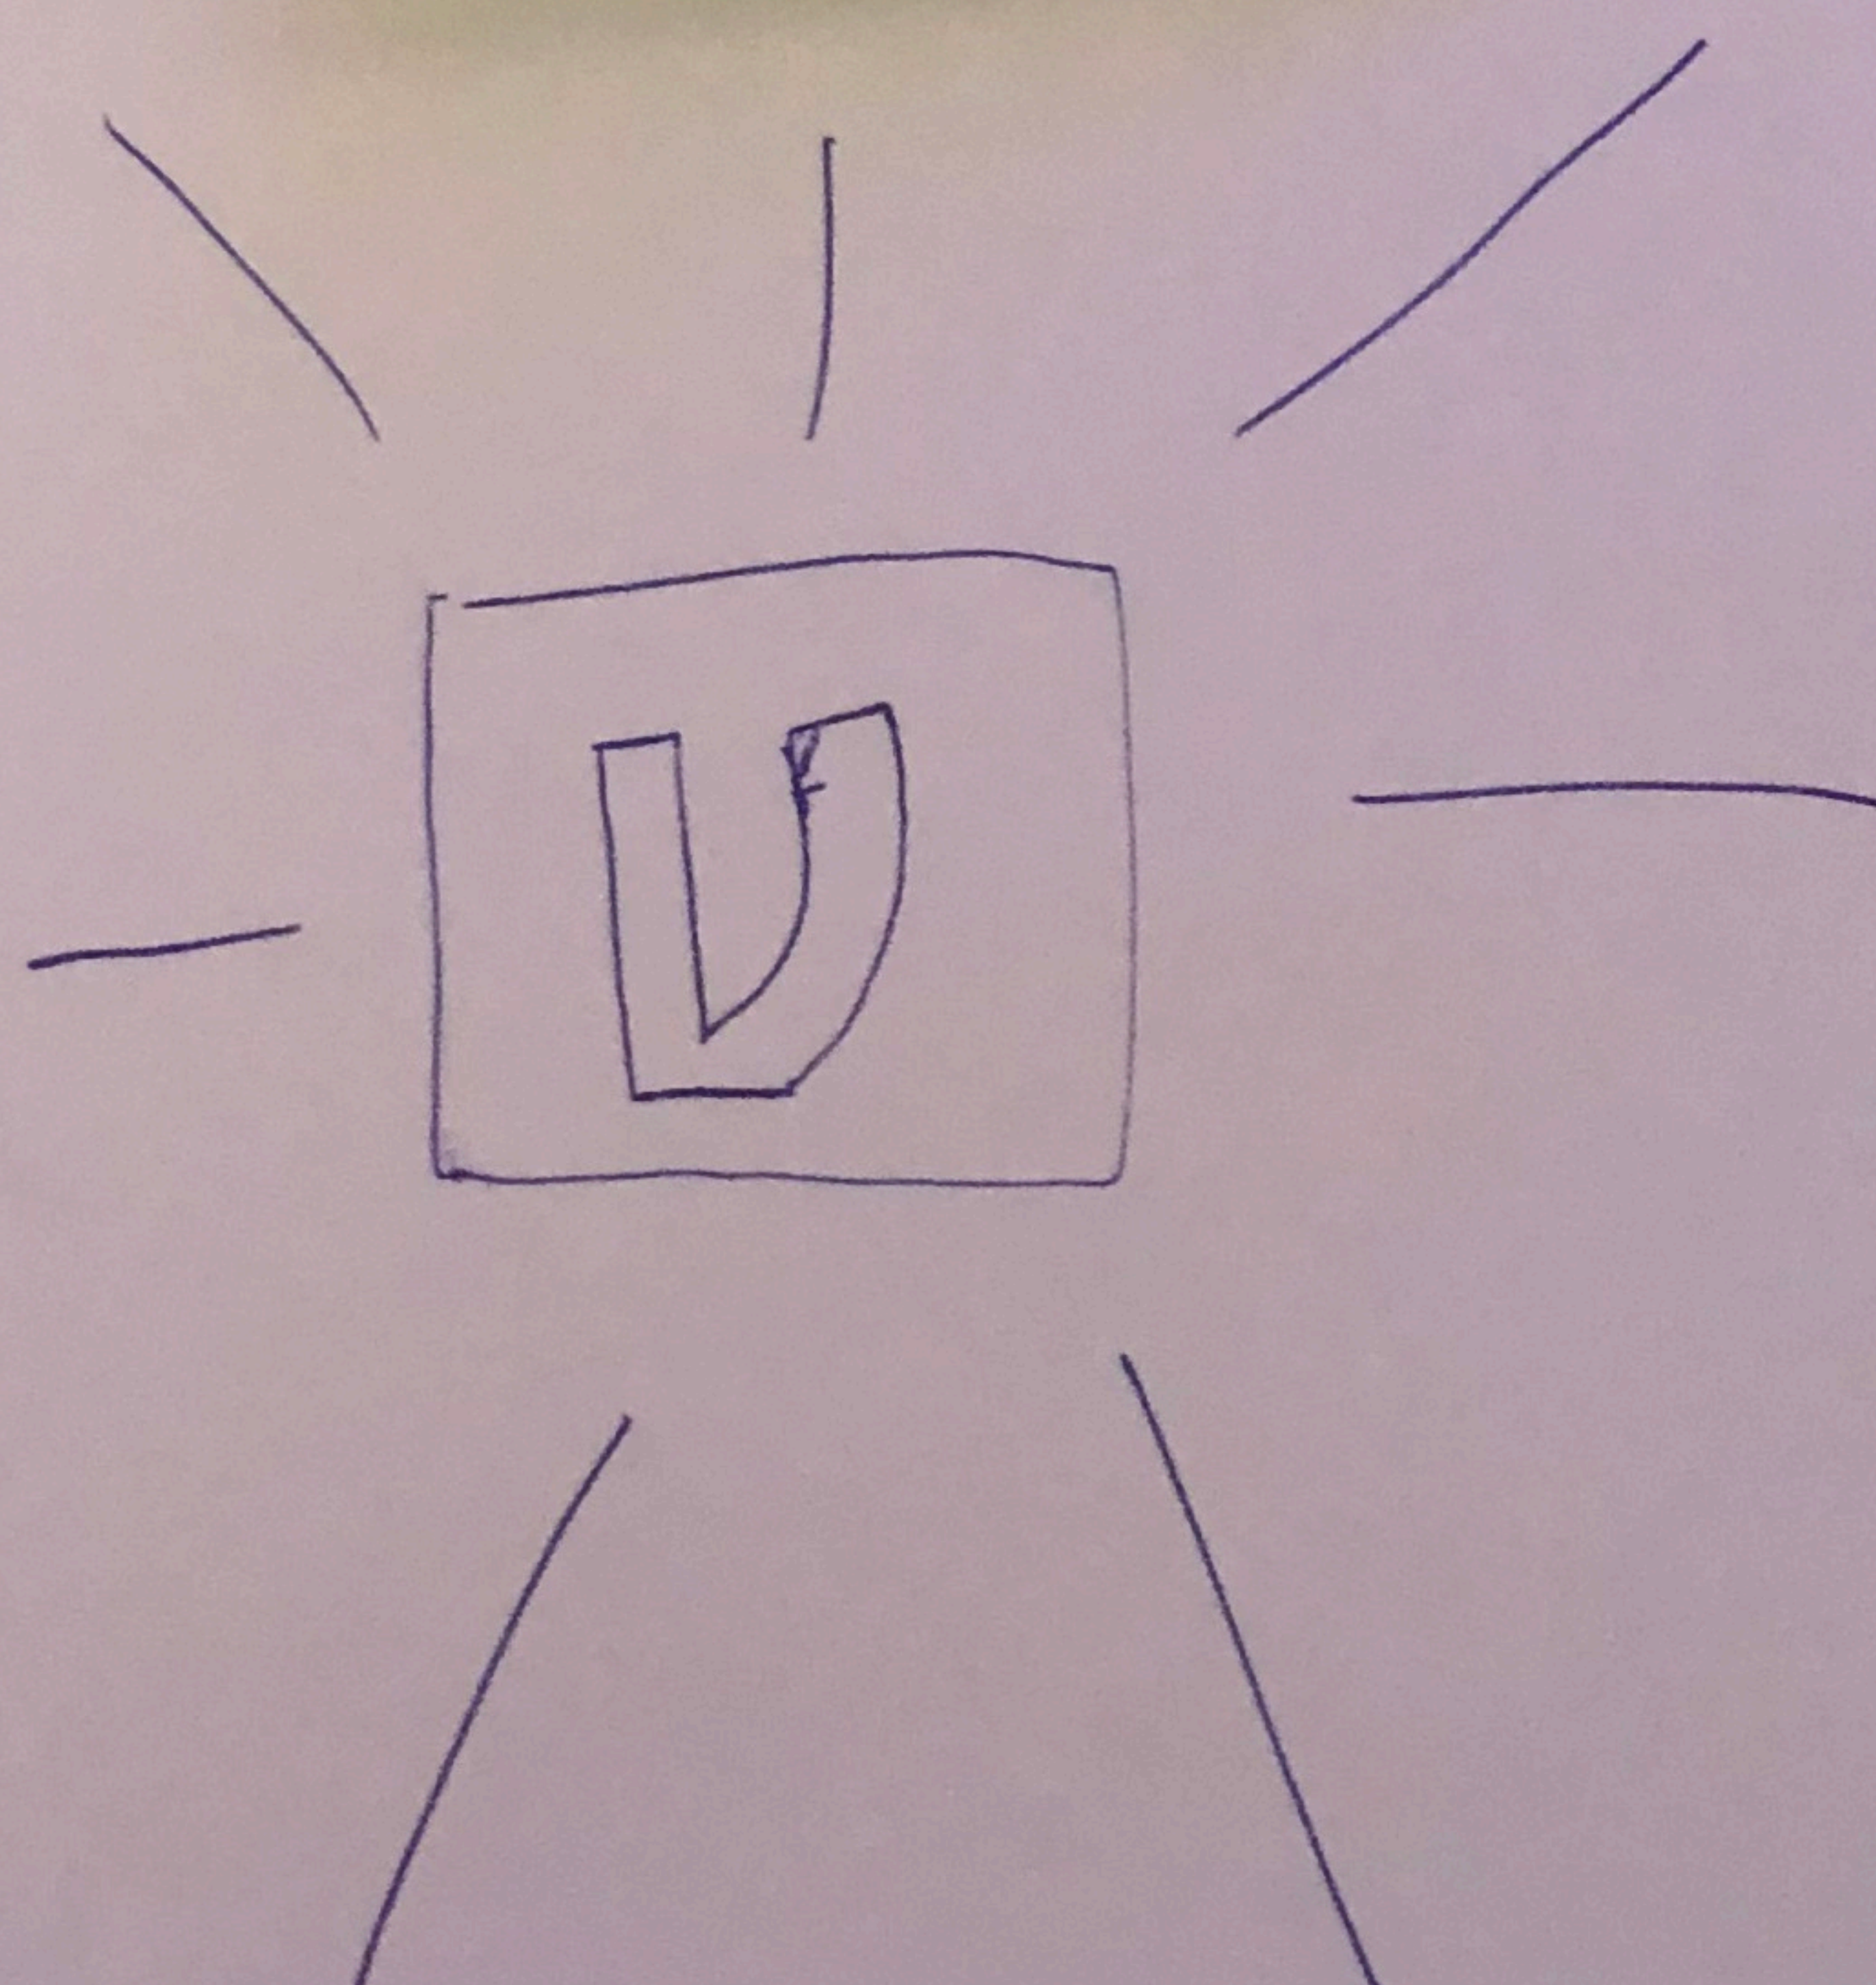

④  
~~Bill splitting~~

He opened the calculator app then calculated everything but it took sometimes because different people ordered the different things also different price

⑤

~~notification~~

After he done the calculation he open the venmo app and request ~~to each of h~~ request the money from all of his friends.

### Pain points

- ① He has to use 2 apps to complete the calculation & payment
- ② Sometimes splitting the bills is a difficult thing to do when each people ordered the different things.

### How to solve?

- ① we could create the ~~button~~<sup>create</sup> "split the bill" feature into the Venmo app with an ability to scan the receipt
- ② This can save a lot of time and make our app users feel convenience.
