

* have drop downs to about, academics, admissions being able to choose on one webpage and then being redirected to you want

• Add a student's tab on top of page so students don't have to scroll to bottom of webpage to access student info

* make all access to different info on side of webpage so it's in front of user; so you don't have to scroll all the way down.

main page
new features

* NYIt.edu
webpage

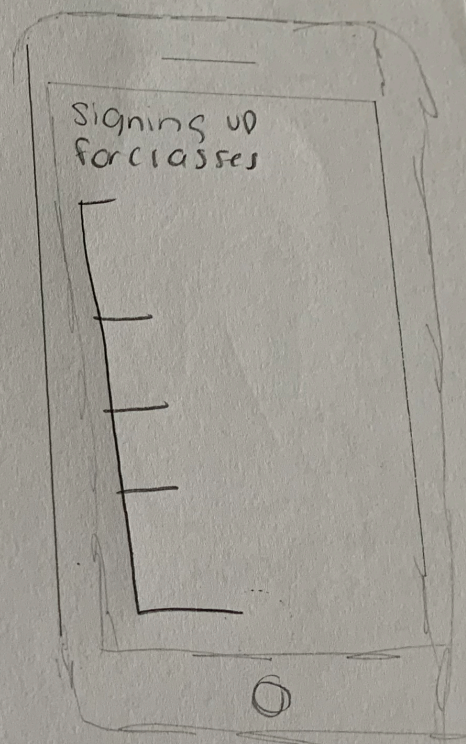

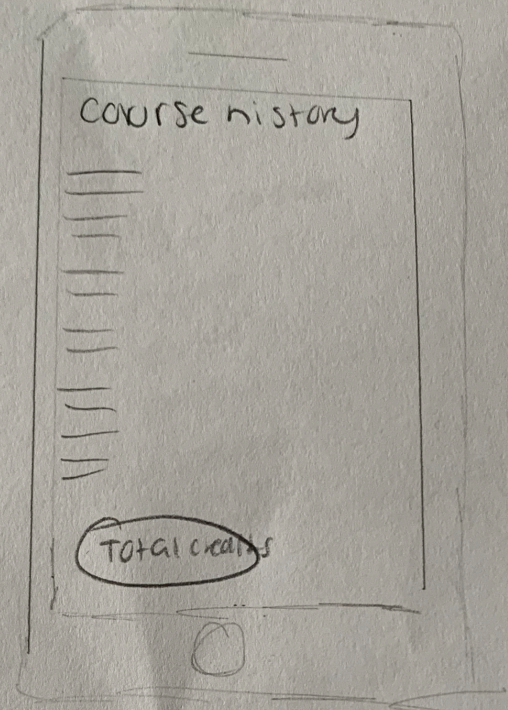

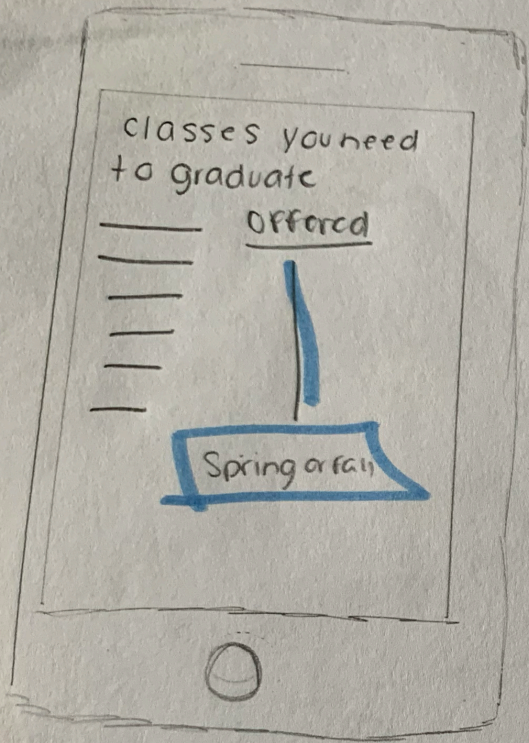

* be able to put finger or cursor over a box to see what info is in each box / where you could find billing student info for students
 "my.nyit.edu"

* have name ID# & email on top of page so student doesn't have to go searching for it

* Add a zoom box with all classes & zoom ID right there

• problem
 no heirachy
 too many places / icons to look; you have to click everywhere to figure out what your looking for

*Add Icon
for classes you still need
so you can see instead
of searching all over

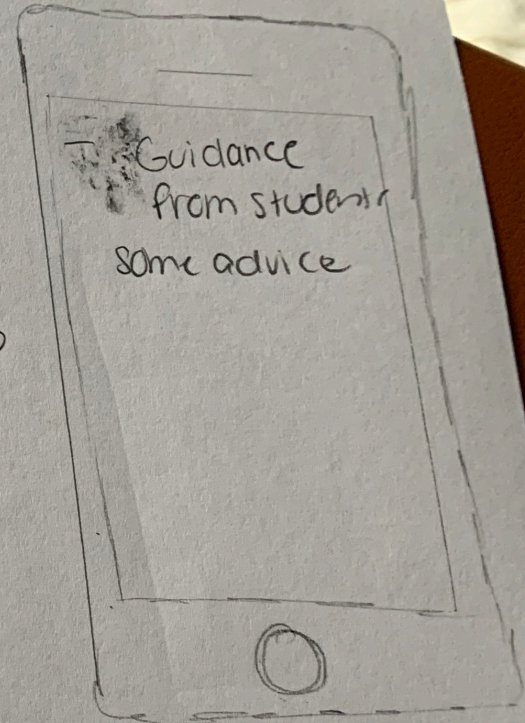

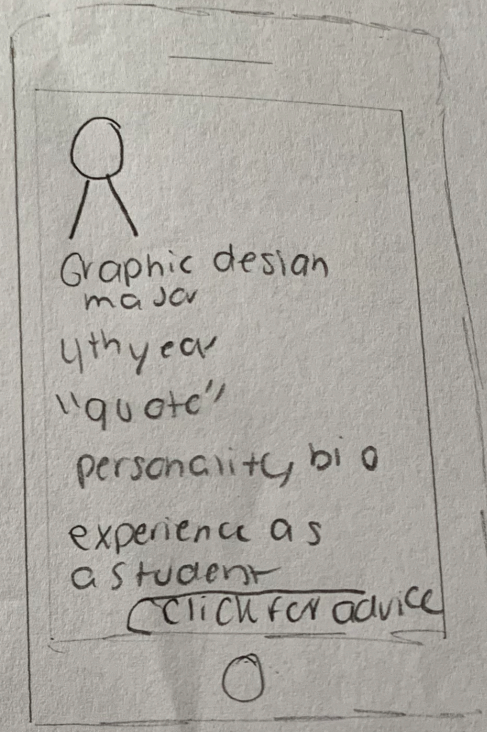

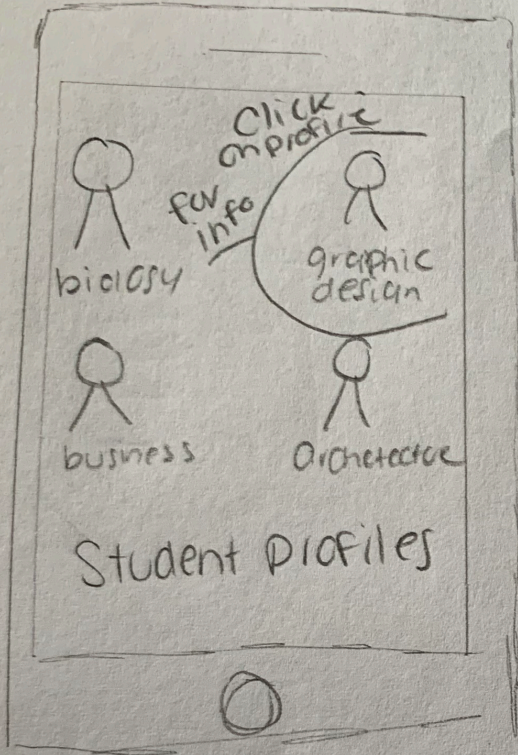

for course history
show total credits
& needed credits

* Show classes
you need, and
only what is offered
-> instead of having
to lock up everything

**Student's
classes
history
Signing up
for classes**

STUDENT Profiles

10/20/20, 10:09 AM

Have a student from each major on webpage talking about classes / experiences at NYIT from each campus to give users a sense of the community

Profile of student

- advice to incoming students or current students at NYIT
