

# Friend/Family Research

- everyday; only for school
- zoom is harder to have contacts (friends)
- timing is limited in zoom (when you create a meeting)
- big on the zoom chat; text is huge.
- wish you can look back at chats.
- chats should save, or <sup>to later reference a link</sup> ~~or~~ <sup>img sent</sup>
- options in zoom are enough.
- see everyone at the same time.

- Square ~~just~~ just goes black. & it doesn't go to the side like on Skype
- save contacts / chat history
- create ~~mutuals~~ mutuals.)
- makes it feel ~~more~~ more personal.

mute mic & camera, and share screens are enough options for a good class exp. on zoom. Doesn't think any more options are missing.

likes that all participants are visible at once during zoom chats. when cam is turned off it just goes black, nothing disappears.
